## PERSONAL PROJECTS

### 1) Voice-Assistant in JAVA (11/2022)

- This is a project which is based on Voice Assistant using **JAVA** and **Sphinx** library.
- Now a days, Amazon Alexa, Google Assistant, Siri and Cortana are very famous. This project is just a small attempt to replicate the same concept. In this voice assistant, user will give a voice commands for opening certain websites and these websites will be opened by the default web browser of the user.
- I have coded this project using JAVA and Sphinx Library has been used for adding speech recognition function in the project.

### 2) Invoice generator project (06/2022)

- Built a system using **HTML, CSS, BOOTSTRAP, REACT**.
- <https://invoice-generator-by-abhay.netlify.app/>
- Generate user friendly features such as easy filling, configuration and downloaded files.
- Used in Sales and Purchase.

### 3) Website Creation Data Pirates (08/2021)

- **HTML, CSS, JAVASCRIPT, MONGO DB**.
- Built a dynamic educational website.
- Authentication Connected backend for User.

### 4) Hotel management System (04/2022)

- Build easy accessible management system.
- Using **C, C++ graphics**.

### 5) E-Voting System (07/2019)

- Programming in **C**.
- I made a software which can be used as Electronic Voting system, in which Admin can register voters and Parties associated with leaders and voters can cast their vote to their leader by casting their precious vote.
